MIRTEC'S MV-6 OMNI 3D AOI MACHINE "TAKES ASIA BY STORM" WINNING TWO PRESTIGIOUS AWARDS

April 2016 – MIRTEC, "The Global Leader in Inspection Technology," is pleased to announce that it was awarded the 2016 EM Asia Innovation Award in the category of Inspection & Testing – AOI for its MV-6 OMNI 3D AOI system. The award was presented to the company during a ceremony that took place April 26, 2016 at the Shanghai World Expo Exhibition & Convention Center during NEPCON China. MIRTEC's MV-6 OMNI also earned the top score in the AOI category, resulting in an SMT China Vision Excellence Award.

Brian D'Amico, President of MIRTEC's North American Sales and Service Division commented, "The EM Asia Innovation Award represents the 30th industry award that has been presented to MIRTEC in recognition of our technologically advanced inspection solutions. It is an honor to receive this award on behalf of MIRTEC's extremely talented engineering team for their outstanding performance in the design and development of our MV-6 OMNI 3D AOI machine."

The award-winning **MV-6 OMNI 3D AOI Machine** is configured with MIRTEC's exclusive OMNI-VISION® 3D Inspection Technology that combines 15 Mega Pixel CoaXPress Camera Technology with MIRTEC's revolutionary Digital Multi-Frequency Quad Moiré 3D system in a newly designed cost-effective platform. MIRTEC's 15 Mega Pixel CoaXPress Vision System is a proprietary camera system designed and manufactured by MIRTEC for use with their complete product range of 3D inspection systems.

MIRTEC's OMNI-VISION® Digital Multi-Frequency Quad Moiré Technology, uses a total of four (4) Programmable Digital Moiré Projectors to capture thirty-two (32) 3D images for each region of interest on a given assembly. This precise height measurement data is analyzed to detect lifted component and lifted lead defects as well as full 3D solder joint integrity post-reflow. Fully configured the new MIRTEC MV-6 OMNI machines feature four (4) 10 Mega Pixel Side-View Cameras in addition to the 15 Mega Pixel Top-Down CoaXPress Camera. There is little doubt that this new technology has set the standard by which all other inspection equipment is measured.

Established in 2006, the EM Asia Innovation Awards program strives to recognize and celebrate excellence in the Asian electronics industry, inspiring companies to achieve the highest standards and push the industry forward.
